

Place Value — Hundreds, Tens & Ones

Reading & writing 2- and 3-digit numbers (up to 999)

Subject Mathematics

Grade Two

Topic Place value · number names

Bloom Understand · Apply

Learning objective (SLO)

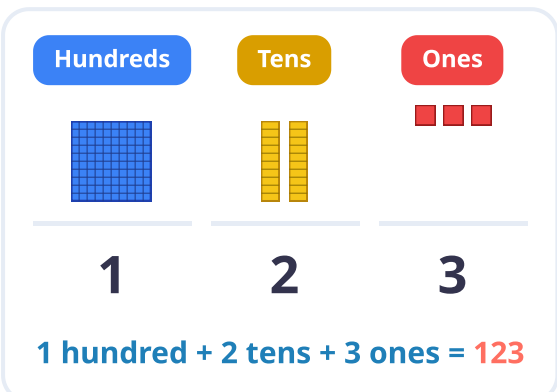

Students will read and write **2- and 3-digit numbers (up to 999)** using **hundreds, tens and ones**, write them in **expanded form** and **number names**, and count **forward and backward by 1s** from a given number.

Understand · Apply

Hook — build 123 on the place-value table

5 min

Draw the three columns and write **123** above them. Point to each digit and ask:

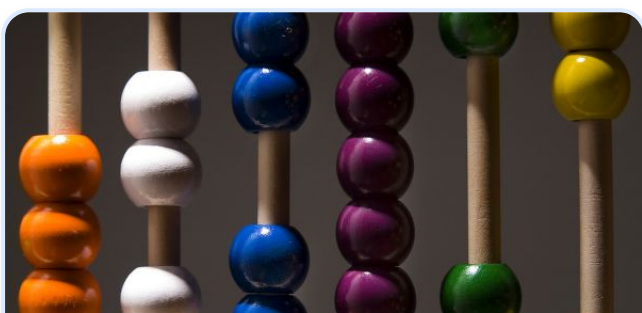

“Which digit shows hundreds? tens? ones?” ·
“1 hundred, 2 tens and 3 ones — how many in all?”

 hundred (100)  ten (10)  one (1)

Today we will learn how to read and write numbers using **hundreds, tens and ones**, and also say their **number names**.

A real tool — the abacus

Abacus

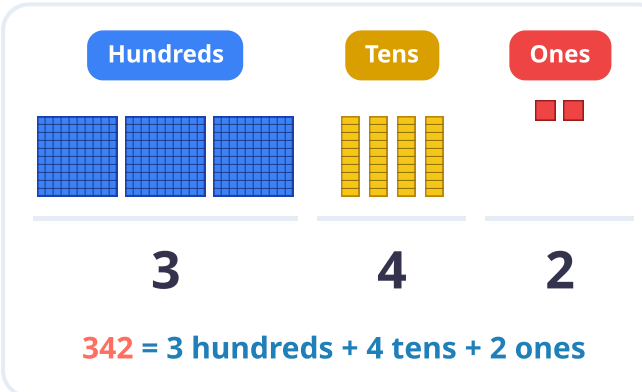

each rod is a place — slide beads for hundreds, tens & ones

An **abacus** shows a number on separate rods — exactly like the **Hundreds · Tens · Ones** columns of our place-value table. Sliding beads on each rod is the same idea as placing **hundred-flats**, **ten-rods** and **one-cubes** in each column.

Explanation — read & write 342

15 min

- In **342**: 3 is in the **hundreds** place, 4 in the **tens**, 2 in the **ones**.
- Expanded form: **342 = 300 + 40 + 2** (3 hundreds = 3×100).
- Value of each digit: **3** → **300**, **4** → **40**, **2** → **2** (because of its place).

Number names — now a small table with just **Tens** and **Ones** for **45**:

4 tens is **Forty**, 5 ones is **Five**, so we say “**Forty-five**”. Now write **72** and read it as “**Seventy-two**” — tens numbers (20–90) usually end with “**ty**”.

45

Forty-five

72

Seventy-two

Ask: What is the value of 4 in 342? · How do we write 45 in words? · 6 hundreds, 0 tens, 2 ones = which number?

Practice — solve in notebooks (with answers)

15 min

Q1. 602 = ___ hundreds, ___ tens and ___ ones

6 hundreds, 0 tens, 2 ones

Q2. Expanded form: $602 = __ + __ + __$

$600 + 0 + 2$

Q3. The digit 6 in 602 is in the ___ place

hundreds

Q4. The digit 0 in 602 is in the ___ place

tens

Q5. The digit 2 in 602 is in the ___ place

ones

Q6. The value of 6 in 602 is ___

600

Q7. The value of 0 in 602 is ___

0

Q8. The value of 2 in 602 is ___

2

Q9. Count backward: 602, ___, ___, ___, 598

601, 600, 599

Q10. Count forward: 602, ___, ___, ___, 606

603, 604, 605

Q11. 72 in words = ___

seventy-two

Q12. 27 in words = ___

twenty-seven

Q13. 90 in words = ___

ninety

Q14. 13 in words = ___

thirteen

Q15. 38 in words = ___

thirty-eight

Walk around; sit beside strugglers and ask leading questions: “Which place is this digit in?” · “What is the tens word here?”

Conclusion — quick verbal quiz

5 min

“What is the value of 7 in 745?”

Answer: 700 (7 is in the hundreds place)

“How do we write 83 in words?”

Answer: Eighty-three
