

The Breathing System

Living things & their environment · how we breathe to stay alive

Subject Science

Grade Five

Time 40 min

Strand Living things

What we will learn

- ✓ Identify the main parts of the breathing system from a chart.
- ✓ Describe the functions of each part to peers.
- ✓ Appreciate keeping the breathing system healthy for healthy living.

Key question: How does the breathing system help us stay alive? What makes it up?

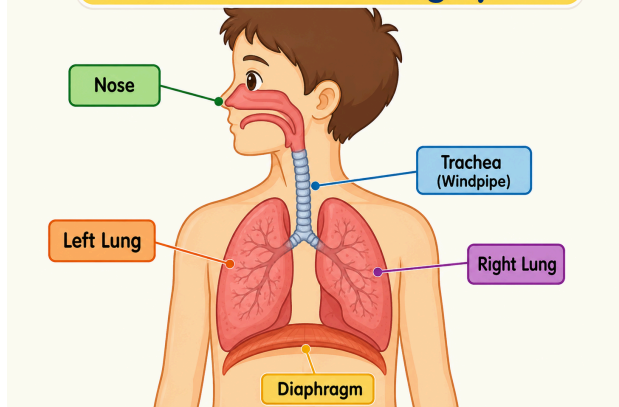

Try it & see it

 **Do together:** Breathe in slowly... and out. Put a hand on your chest — feel it move! Then ask: which body parts help us breathe?

The Human Breathing System

The breathing system

NANO-BANANA-2-LITE

Breathe in, breathe out

The parts & their jobs

Nose

Warms, cleans and moistens the air we breathe in.

Trachea (windpipe)

A tube that carries air down to the lungs.

Lungs

Take in oxygen and let out carbon dioxide — gas exchange.

Diaphragm

A muscle below the lungs that pulls air in and pushes it out.

How our lesson flows

1

Study the chart

Study the breathing-system chart and explain the functions of each part. (Learning to learn; creativity.)

2

Label in groups

In groups, discuss how to label the parts — using polite etiquette. (Love & respect.)

3

Search healthy habits

Use a digital device to find ways to keep the breathing system healthy. (Digital literacy.)

Check, care & extend

Q Name 4 parts of the breathing system.
→ Nose, trachea, lungs, diaphragm.

Q What is the work of the lungs?
→ Take in oxygen, let out carbon dioxide.

Q Why is the nose important?
→ It warms and cleans the air we breathe.

Q State 2 ways to keep it healthy.
→ Avoid smoking · exercise / breathe clean air.

Keep it healthy: avoid smoking, breathe clean air, and exercise.

SAFETY

Extended activity: Draw and label the breathing system in your book, and write 3 ways of caring for it.
