

The Breathing System

Living things & their environment

ID breathing-g5

Subject Science

Grade Five

Time 40 min

Type Concept — Human body

Objectives

2 min

- Identify the main parts of the human breathing system from a chart. Remember
- Describe the functions of each part of the breathing system to peers. Understand
- Appreciate the need to keep the breathing system healthy for healthy living. Value

Resources & Support

Resources

- Chart & model of the breathing system
- Pictures of lungs and nose
- Balloons
- Flashcards
- Textbook (teacher's & learner's)
- An internet-enabled digital device

Key inquiry questions

How does the breathing system help us stay alive? What makes up the human breathing system?

Introduction

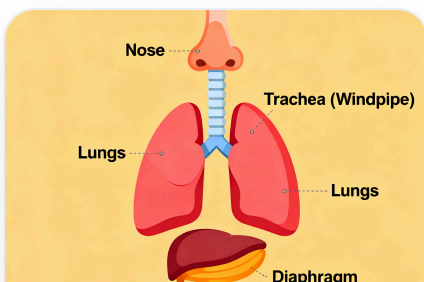

5 min

Let's all breathe in slowly... and breathe out. Put a hand on your chest — can you feel it move?

Do & ask: Guide learners to breathe in and out, then ask: which body parts help us breathe?

See it — the breathing system

The breathing system

Breathe in, breathe out

Explanation & Teaching

18 min

Step 1 — Study the chart

Learners study the breathing-system chart and explain the functions of the nose, trachea (wind pipe), lungs and diaphragm. (Learning to learn; creativity & imagination.)

Step 2 — Label in groups

In groups, learners discuss how to label the parts of the breathing system, using polite etiquette. (Core value: love & respect.)

Step 3 — Search healthy habits

Using a digital device, learners search for ways to keep the breathing system healthy. (Core competency: digital literacy.)

Check for understanding

Which part warms and cleans the air we breathe in?

The nose.

What is the work of the lungs?

They take in oxygen and let out carbon dioxide (gas exchange).

Which muscle helps pull air into the lungs?

The diaphragm.

Assessment & Wrap-up

5 min

Quick oral check — thumbs up for True, thumbs down for False.

The nose helps warm and clean the air we breathe.

Smoking is good for the breathing system.

The lungs take in oxygen and let out carbon dioxide.

Exit ticket

Ask orally: Name 4 parts of the breathing system · What is the work of the lungs? · Why is the nose important? · State 2 ways to keep the breathing system healthy (e.g. avoid smoking, exercise).

Homework

Draw and label the human breathing system in your exercise book and write 3 ways of caring for it.
