

Place Value — Hundreds, Tens & Ones

Reading & writing 2- and 3-digit numbers (up to 999)

ID 109713

Subject Maths

Grade Two

Class 34

Time 40 min

Type Concept — Place value & number names

Objectives

2 min

- Students will read and write 2- and 3-digit numbers (up to 999) using hundreds, tens and ones, write them in expanded form and number names, and count forward and backward by 1s from a given number.

Apply

Introduction

5 min

Draw a table with three columns — Hundreds, Tens, Ones — and write 123 above it.

Point & ask: Which digit shows hundreds? Which shows tens? Which shows ones? Let a few students answer.

Think: If I have 1 hundred, 2 tens and 3 ones, how many blocks do I have in all? Today we learn to read and write numbers using hundreds, tens and ones — and say their number names.

Hook — build 123 on the place-value table

5 min

Explanation & Teaching

15 min

Place	In 342, 3 is in the hundreds place, 4 is in the tens place, and 2 is in the ones place.
Expanded	$342 = 3 \text{ hundreds} + 4 \text{ tens} + 2 \text{ ones} = 300 + 40 + 2$. We write 300 because 3 hundreds means 3×100 .
Value	The value of 3 is 300, the value of 4 is 40, and the value of 2 is 2 — because of the place they are in.
Number names	4 tens is Forty, 5 ones is Five, so we say “Forty-five”. Read 72 as “Seventy-two” — tens numbers (20–90) usually end with “ty”.

Check for understanding

What is the value of 4 in 342?	How do we write 45 in words?	6 hundreds, 0 tens and 2 ones = which number?
40	Forty-five	602

See it in the place-value tables

Practice — solve in notebooks (with answers)

15 min

Students solve individually, then check together. Walk around; sit beside strugglers and ask leading questions like “Which place is this digit in?” or “What is the tens word here?”

- Q1: $602 = \underline{\hspace{1cm}} \text{ hundreds}, \underline{\hspace{1cm}} \text{ tens}, \underline{\hspace{1cm}} \text{ ones} \rightarrow 6 \text{ hundreds}, 0 \text{ tens}, 2 \text{ ones}$
- Q2: 602 in expanded form $\rightarrow 600 + 0 + 2$
- Q3: the digit 6 in 602 is in the $\underline{\hspace{1cm}}$ place $\rightarrow$ hundreds
- Q4: the digit 0 in 602 is in the $\underline{\hspace{1cm}}$ place $\rightarrow$ tens
- Q5: the digit 2 in 602 is in the $\underline{\hspace{1cm}}$ place $\rightarrow$ ones
- Q6: the value of 6 in 602 $\rightarrow 600$
- Q7: the value of 0 in 602 $\rightarrow 0$
- Q8: the value of 2 in 602 $\rightarrow 2$
- Q9: count backward — 602, $\underline{\hspace{1cm}}, \underline{\hspace{1cm}}, \underline{\hspace{1cm}}, 598 \rightarrow 601, 600, 599$
- Q10: count forward — 602, $\underline{\hspace{1cm}}, \underline{\hspace{1cm}}, \underline{\hspace{1cm}}, 606 \rightarrow 603, 604, 605$
- Q11: 72 in words $\rightarrow$ seventy-two
- Q12: 27 in words $\rightarrow$ twenty-seven
- Q13: 90 in words $\rightarrow$ ninety
- Q14: 13 in words $\rightarrow$ thirteen
- Q15: 38 in words $\rightarrow$ thirty-eight

Conclusion — quick verbal quiz

3 min

- What is the value of 7 in 745? $\rightarrow 700$ (7 is in the hundreds place)
- How do we write 83 in words? $\rightarrow$ Eighty-three
